

OR IMMEDIATE RELEASE:

## **Wouter Luimes Joins SEAM Group, LLC, as Vice President of Sales, Europe**

June 3, 2019 [Cleveland, Ohio] – SEAM Group, LLC, has hired Wouter Luimes as Vice President of Sales, Europe. Mr. Luimes is responsible for business development and sales for all of SEAM Group's business units across Europe.

Wouter brings 25 years of experience in International Business Development, Strategic Sales and Account Management to his new role. He spent five years as Director of Business Development EMEA with ABS Group of Companies, Inc., and 18 years at Stork Fluor, rising to Executive Account Director for the Chemical Industry and co-founding Stork Asset Management Consultancy group which developed into a global engineering consultant organization. At Fokker Aircraft B.V., Luimes was responsible for the development of aircraft maintenance programs and engineering support.

“His knowledge of the EAM industry, combined with technical expertise and the ability to anticipate customer needs based on solid relationships throughout Europe, will allow SEAM to provide stellar EAM services abroad,” said Don Frankel, President & Chief Growth Officer, SEAM Group.

Having earned a degree in Aeronautical Engineering from the University of Applied Sciences (Haarlem, The Netherlands), and attended masterclasses in Asset Management and Strategic Selling and Key Account Management, Luimes is a recognized expert in EAM strategy, reliability, maintenance strategy, and asset integrity management.

“Wouter will be a strong addition to our European sales team with his extensive experience in business development, customer service, and account management.” said Mike Veal, CEO SEAM Group.

### **ABOUT SEAM Group**

SEAM Group offers an unparalleled approach to strategic enterprise asset management, ensuring a safe environment while achieving improved utilization, enhanced performance and reliability, all while reducing costs. SEAM Group services are provided in four areas; Safety Services, Facility Services, Asset Management and Condition Monitoring. Each group of services is supported by certified professionals and patented software, ensuring program metrics are achieved.

As an innovative technology leader for safety, maintenance and reliability programs, we are changing the benchmark for service companies. SEAM Group services are designed to create sustainable change to your environment, people, processes and workflows. Viewpoint our award-winning predictive maintenance software and our newly developed mobile platform ViewPoint On-Demand, brings leading-edge solutions to help our clients manage their programs and sustain success.

Headquartered in America, we offer services globally via regional offices throughout the world. SEAM Group, formerly Predictive Service and Lewellyn Technology, has been selected (12) times by Inc. 5000 as one of America's Fastest Growing Companies.
